What makes a great dentist? Dr. Keith Metzger's patients will happily tell you that in addition to providing quality dentistry, it's the gentle, friendly, individualized care they receive. How do Dr. Metzger and his team provide this? Dr. Metzger says they do what comes naturally to them. "Taking great care of our patients is second nature for us. We love meeting and helping new and existing patients alike. Everyone we see receives personal attention. I have a great staff too. Many of them have been with me for over 15 years and our patients enjoy seeing familiar, smiling faces visit after visit."

After obtaining his Doctor of Dental Surgery degree from the University of Texas Health Science Center, Dr. Metzger returned to his hometown area to establish his practice. From the very beginning, Dr. Metzger and his staff have always strived to create a "Wow" experience with each patient—whether it's during their routine teeth cleaning appointment or a full smile makeover visit.

During his 25 years in practice, Dr. Metzger has seen a lot of changes in dentistry and enjoys staying up-to-date on the latest techniques and technology. His dedication to continuing education shows and his patients benefit. Dr. Metzger's office provides the most up-to-date materials and equipment to best serve his patient's dental needs.

Be sure to ask Dr. Metzger's staff about his Patient Referral Program and receive a \$25 credit to be used when you or a family member makes an appointment for an initial exam!
